

National Taiwan Normal University

The Program of Artificial Intelligence and Metaverse Narrative

Study and Application Regulations

Passed in the University's 1st Curriculum Meeting on November 1st, 2023
Passed in the University's 1st Curriculum Meeting on October 29th, 2025

1. To encourage interdisciplinary learning in literature, history, art, design, and digital information, National Taiwan Normal University (hereinafter referred to as “the school”) provides the “The Program of Artificial Intelligence and Metaverse Narrative” (hereinafter referred to as “the Program”). The Program is jointly planned and co-organized by the College of Liberal Arts, Department of Chinese, Department of English, Department of History, Department of Geography, Department of Taiwanese Languages and Literature, Department of Design, Department of Graphic Arts and Communications, Department of Technology Application and Human Resource Development and Center for General Education. Department of History serves as the chief organizer.
2. Students should accomplish a minimum of 14 credits, including 6 from the required course and 8 from elective courses. For detailed course information, refer to the “The Program of Artificial Intelligence and Metaverse Narrative Course Requirements.”
3. Accomplished courses which are same or similar to the program’s courses can be recognized after the review of program’s organizers; yet there is a limit up to 6 credits only.
4. This program adopts a certification system. Students can apply through the academic system during the second semester of each academic year, following the schedule announced by the Office of Academic Affairs. Students who have obtained eligibility for the accredited program will have priority in course selection for the program during the initial course selection period. After completing the program’s course and credit requirements, students must submit an application form and transcript (all academic years). Upon verification by the program’s organizers, they can then apply for a certificate at the Office of Academic Affairs.
5. Students who have officially registered for this program but have not yet completed the required courses and credits for this program, or those who have not registered for this program but have completed at least one-third of the program’s required credits, despite meeting their department’s (or institute’s) graduation requirements, may apply for an extension of their study period. Otherwise, they will be deemed to have forfeited their eligibility to complete the program. However, students admitted to master’s or doctoral programs within the Taiwan University System may apply to continue their studies in this program after enrollment.
6. Related items not mentioned in the regulations will follow NTNU’s related regulations.
7. The regulations are implemented or revised through the approval of the NTNU Academic Affairs Meeting.
